SUMMARY

B.Tech Computer Science student specializing in AI/ML and Full-Stack development, proficient in Python, deep learning, and REST APIs. Successfully automated workflows to reduce manual effort by 80% and developed real-time computer vision systems, including an AI-based helmet detection tool. Currently engineering a full-stack AI workout application. Seeking an AI/ML full time role to apply technical expertise in backend architecture and real-time inference to cutting-edge initiatives.

EDUCATION

DRK Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering (AI & ML) – CGPA: 6.92

Hyderabad, Telangana

2022 – 2026

Mahabub College Junior College

Intermediate (MPC) – CGPA: 6.2

Hyderabad, Telangana

2020 – 2022

Radiant High School

SSC – CGPA: 9.8

Hyderabad, Telangana

2020

PROJECTS

AI-Based Helmet Detection for Construction Sites | *Python, YOLOv8, Streamlit*

- Developed a real-time computer vision system using YOLOv8, featuring custom dataset preprocessing and optimized inference for automated safety monitoring with 96% accuracy.
- Built an interactive dashboard with Streamlit that supports live webcam feeds and automated alerts to improve site safety and compliance.

AI-Workout App | *Flutter, Dart, PHP, MySQL*

- Architecting a full-stack mobile application featuring AI-generated fitness recommendations, personalized workout plans, and real-time progress tracking.
- Implementing a scalable backend using PHP and MySQL with secure Google Sign-In authentication and automated cloud data storage.

AI-Based Plagiarism Detection Tool | *Python, FastAPI, Streamlit, NLP*

- Engineered an AI detection system using NLP techniques and perplexity scoring to accurately classify text as AI-generated or human-written.
- Developed a responsive web interface with FastAPI and Streamlit that supports multi-format file uploads and real-time analysis for academic integrity.

TECHNICAL SKILLS

Languages: Python, Java, C, HTML/CSS, JavaScript, Dart

AI-Tools: ChatGPT, Gemini, Claude

Backend & APIs: PHP, RESTful APIs

Frameworks & Libraries: PyTorch, OpenCV, FastAPI, Streamlit, React.js, Flutter

Databases: MySQL, MongoDB

Domains: Machine Learning, Deep Learning, Computer Vision, NLP, Real-time Inference
