Projects

1. **AI-Based Plagiarism Detection Tool**
 - Developed an AI-powered plagiarism detection system that classifies text as AI-generated or human-written using NLP techniques and perplexity scoring. Built with **Python, FastAPI, and Streamlit**, the system supports file uploads, real-time analysis, and an intuitive UI.
 - Designed to assist educators and institutions in identifying AI-generated academic content efficiently.
2. **AI-Workout APP:**
 - Currently developing a full-stack AI-powered fitness mobile application using **Flutter Dart, PHP with MySQL**. The app provides personalized workout plans, user authentication (Google Sign-In), workout tracking, and backend data storage.
 - Focused on building a scalable architecture with real-time progress tracking and AI-generated fitness recommendations.
3. **Personal Portfolio Website:**
 - Built a responsive and interactive portfolio website using HTML, CSS, and JavaScript to present my AI-based plagiarism detection tool, deep learning projects, and full-stack applications. Implemented modern UI design, animated elements, skill visualization, and mobile responsiveness.
